

Doosan delivery helps boost Bearmach

Doosan and Land Rover: a match made in heaven

Starting life as a small family company, Bearmach has grown to become one of the UK's largest independent suppliers of Land Rover parts and accessories.

Bearmach is now an authorised European distributor for Land Rover and Jaguar, supplying to well over 120 countries worldwide. With goods constantly being shipped in and out of its two operational sites, covering more than 50,000 square feet in Caerphilly, Wales, the company was keen to streamline its materials handling movements and enhance safety.

Simple powerful performance

To help achieve this, Bearmach sought Doosan's 'simple powerful performance' and turned to authorised dealer Gwent Mechanical Handling. The result was a fleet of five new Doosan trucks – 4 compact three-wheeled electric counterbalance trucks (B15T & B20T), alongside a LEDH 18 powered pallet truck.

Safety and stability are key

The trucks were supplied with customised extending forks, increasing the safety and stability with which Bearmach is able to move around the parts and accessories – including high-end products like body shells, panels, and even complete Land Rover and Range Rover chassis – that are the backbone of the business.

“We are exceptionally pleased with our new forklifts from Doosan”

The operator compartments on the Doosan forklifts have been designed with driver comfort in mind. Optimised pedal positions, ergonomic hydraulic levers and a fully-adjustable steering wheel all help to reduce operator fatigue and maximise productivity. And, with safety paramount in Bearmach's busy

work environment, the fact that these ultra-manoeuvrable trucks have Oil-Cooled Disc Brakes and the latest Operator Sensing Systems fitted as standard provides additional peace of mind.

Great value for money

Richard Green, Supply Chain and Operations Manager at Barmach said “They are powerful, reliable and cost-effective and an added bonus is that we now have forklifts with weather-proof cabs, which is always a great help with the weather we usually get in Wales!”

Big productivity increase

Since taking delivery of the new Doosan trucks, Barmach has noticed a clear increase in productivity and – with greater order efficiency – there have been cost savings too. A focus on reliability, safety and operator comfort has allowed Doosan to become a leading provider of forklifts in the UK. With high-specification features and proven technology, Doosan also boasts the lowest total costs of ownership.

“They are powerful,
reliable and
cost-effective.”
